

## Current Veterinary Clinical Trials

# FUNGAL DISEASE

Exploring New Diagnostics in Cats and Dogs

### ■ Purpose

- The purpose of this study is to investigate new, rapid diagnostic tests for fungal diseases in cats and dogs.

### ■ Participation Requirements

- Cats and dogs with a suspected Cryptococcus infection
- To determine eligibility, please make an appointment with Internal Medicine at the UC Davis VMTH.

### ■ Procedures

- Collect a blood sample and analyze it with the standard Cryptococcus test and two new fungal tests

### PRINCIPAL INVESTIGATORS

Dr. Jane Sykes • Dr. Krystle Reagan

### CONTACT INFORMATION

(530) 752 - 1393 to make an appointment  
[www.vetmed.ucdavis.edu/clinicaltrials/](http://www.vetmed.ucdavis.edu/clinicaltrials/)

### ■ Owner Responsibilities

- Keep all scheduled appointments
- Cover costs of all other recommended diagnostics and therapies recommended by your veterinarian beyond the Cryptococcus latex agglutination test

### ■ Benefits

- The study will cover the costs of the Cryptococcus latex agglutination blood test.
